Our Camp Philosophy

Here at the Wichita Ice Center we realize the importance of kids and adults receiving a balanced learning experience. Our Youth camp will feature "skating specific" instruction to enable each player to develop their skating skills. Areas of focus will be speed, power and edges. Players will also be challenged by our specific skill development stations; which will include puck-handling, shooting, puck protection, body contact and stick-checking for the younger kids and adults.

Our Elite Program will focus on high-tempo skating, shooting and passing drills. Players will be challenged to move outside their "comfort" zones. Players will also be learning about positional situations such as offensive/defensive zone coverage, break-out's and offensive/defensive strategies. We will also spend time focusing on proper body-checking techniques.

Our Adult camp will focus on foundational skating drills, mixed with positional play drills. Players will be challenged with game-specific situational drills such as fore-checking strategies, play development and shooting mechanics and goal-scoring techniques. Players may be treated to an organized scrimmage, however these may only be fifteen minutes in duration. Our focus will be on improving skating, shooting, and team play skills.

We hope all players come away from camp with a better understanding and love for hockey, the greatest game on Earth.
